

ABSORBING FOAMS

Material Summary Sheet 1

Offering solutions for a wide range of applications such as...

- Commercial vehicles
- Leisure vehicles
- Machine enclosures
- Appliances

Absorbing Foams

TUFCOTE™ acoustical absorbing foams are widely used to reduce noise levels within a given space—from equipment cabinetry to vehicle cabs. These tough urethane foams are easily installed, and are available with a variety of protective facings, in thicknesses to match the environmental needs of most any application.

E-A-R has formulated TUFCOTE acoustical foams to meet the needs of specific markets. M-Series foams, e.g., M-100RM, have been developed specifically for transportation applications, such as heavy-duty trucks. E-Series foams are for general OEM use. H-Series foams include additional flame retardant levels and are designed to meet industry requirements for electrical enclosures, generators and similar equipment.

- Economical, functional sound absorption
- Available in composite form with TUFCOTE barriers and with pressure-sensitive adhesive (PSA) backing
- Select from E-, M-, and H-Series, depending on flammability requirements
